Hydraulic ramp kit for beaver tail or low loader applications

Comprehensive hydraulic ramp kit for beaver tail or low loader applications - customisable to suit your requirements.

Standard kit includes:

- Quality DC Bucher powerpack
- twin 2.5" bore x 24" stroke single stage cylinders
- flow control valve
- pendant control
- hose burst valves
- hose, fittings, adaptors, hydraulic oil and wiring.

The 12V or 24V Bucher powerpack is compact and easily mounts in your preferred position. The flow control valve allows you to adjust the speed of the ramps as they come down and the hose burst valves will restrict the ramps from falling fast if a hose was to burst.

The kit includes 5m of hydraulic Ryco hose with adaptors and hose ends you are able to attach yourself, also 9m of heavy duty battery cable and lugs. The two button controller has a 3m cable allowing you to move the ramps while standing safely away from operating area.

Options:

- **Lever controlled powerpacks**
- **Different bore and stroke cylinders**
- **Over centre valves hard-plumbed to cylinders**
- **Single cylinder kits**
- **Single acting kits (gravity down)**
- **Bar and bushes for hinge fabrication**

Part numbers:

RAMP02.24 – Hydraulic ramp kit double acting 24V

RAMP02.12 – Hydraulic ramp kit double acting 12V
